## FURAN F.R.

### DESCRIPTION

Furan is a naturally looking transparent curtain fabric with a sustainable footprint. The open linen-look-a-like structure is created with a mixture of yarns of uneven thickness and in several different color depths. Furan is fused with a technologically advanced material. To produce Furan, used plastic PET bottles are collected and transformed into reusable polyester filaments. This process is significantly more energy-efficient than for virgin polyester and reduces the use of natural resources. Furan is available in a wide range of natural and deep colors. The palette contains 19 inspiring colors.
