SCULPTURE F.R.

DESCRIPTION

Sculpture is an elegant curtain fabric with a subtle 3D structure. The sophisticated gloss of the filaments give the fabric a rich look. Sculpture is fused with a technologically advanced material. To produce Sculpture, used plastic PET bottles are collected and transformed into reusable polyester filaments. This process is significantly more energy-efficient than for virgin polyester and reduces the use of natural resources. Sculpture is available in a wide range of well-balanced colours. The palette contains 16 inspiring colours.
